## PROJECTS

---

### Yoga Pose Detector and Corrector with Sign Language Assistant

Python, OpenCV, MediaPipe, Random Forest

- Working on a project, which is a system that can detect and correct yoga postures and includes a sign language assistant.
- Utilizing tools like OpenCV and MediaPipe for posture detection and a Random Forest classifier to determine the correctness of the posture.

### E-Commerce Website

React.js, Redux, Node.js, MongoDB

- Created a modern, responsive clone of a popular e-commerce website using React.js and Redux.
- Implemented features like product browsing, searching, filtering, user authentication, and order management.
- Aimed to provide a seamless user experience and powerful admin tools for managing the platform efficiently.

### Airbnb Clone

HTML, CSS, JavaScript, Express.js, MongoDB

- Developed an Airbnb clone with HTML, CSS, and JavaScript for the front-end.
- Built the backend using Express.js and MongoDB.

## EXPERIENCE

---

### React.js Intern

May 2024 - July 2024

Celebal Technologies Pune, India

- Developed dynamic web applications using React.js, creating reusable components and utilizing hooks for enhanced performance.
- Managed state with Redux, and implemented React Router for seamless navigation.
- Collaborated using Git for version control, ensuring streamlined project development and teamwork.
